Medical Exemption Form

To Whom It May Concern:

Children with medical exemptions shall be permitted to attend school except in the case of a vaccine-preventable disease outbreak in the school. All susceptible students will be excluded from school based on public health officials' determination that the school is a primary site for disease exposure, transmission and spread into the community. Students excluded from school for this reason will not be able to return to school until (1) the danger of the outbreak has passed as determined by public health officials, (2) the student becomes ill with the disease and completely recovers, or (3) the student is immunized. For example, for measles the complete incubation period is 18 days from the onset of symptoms for the last case in the community. Outbreaks like measles may last for several months.

According to State statutes (Connecticut General Statutes Sections 19a-7f and 10-204a), no child may be admitted to school without proof of immunization or a statement of exemption. Parents or guardians seeking an exemption on the basis that a given immunization is medically contraindicated should attach to this form a statement signed by their physician stating that in the physician's opinion, such immunization is medically contraindicated and why it is contraindicated (e.g., hypersensitivity to a vaccine component, demonstrated reaction to vaccine, etc.). In addition, the parents/guardians should complete the following statement and return it to the school nurse.

As the parent(s)/guardian(s) of		(Name	e of student)	,
I/we are submitting the enclosed docuthis child is medically contraindicated. required immunization as specified by school except in the case of a vaccine	There the pl	efore, this nysician, a	child is exemp and shall be pe	t from receiving the ermitted to attend
