## Update!

### 2011-2012 Indiana School Immunization Requirements

#### Changes:

Changes to the 2011-2012 School Immunization Requirements are as follows:

- Two (2) doses of varicella vaccine, or evidence of immunity, will be required for Kindergarten & First grade students. This is a 'roll-up' requirement from last year's two dose varicella requirement for all Kindergarten students.

#### Summary of Required Doses by Grade:

|                         |  |                              |
|-------------------------|--|------------------------------|
| <b>3 to 5 years old</b> | 3 Hep B (Hepatitis B)                    |                              |
|                         | 4 DTaP (Diphtheria, Tetanus & Pertussis) |                              |
|                         | 3 Polio (Inactivated Polio)              |                              |
|                         | 1 MMR (Measles, Mumps & Rubella)         |                              |
|                         | 1 Varicella                              |                              |
| <b>K &amp; 1</b>        | 3 Hep B                                  | 2 MMR                        |
|                         | 5 DTaP                                   | 2 Varicella                  |
|                         | 4 Polio                                  |                              |
|                         |  |                              |
| <b>Grades 2 to 5</b>    | 3 Hep B                                  | 2 MMR                        |
|                         | 5 DTaP                                   | 1 Varicella                  |
|                         | 4 Polio                                  |                              |
|                         |  |                              |
| <b>Grades 6 to 12</b>   | 3 Hep B                                  | 2 MMR                        |
|                         | 5 DTaP                                   | 2 Varicella                  |
|                         | 4 Polio                                  | 1 Tdap (Tetanus & Pertussis) |
|                         |  | 1 MCV (Meningococcal)        |
|                         |  |                              |
