¹ Refer to CDC's 2012 Recommended Childhood and Adolescent Immunization Schedule for vaccinating high risk children at: <http://www.cdc.gov/vaccines/recs/schedules/child-schedule.htm#printable>.

² This schedule lists state-supplied childhood vaccines and is consistent with the recommended age range of CDC's *Childhood and Adolescent Immunization Schedule* (<http://www.cdc.gov/vaccines/recs/schedules/child-schedule.htm>). CDC recommendations for individual vaccines are available at www.cdc.gov/vaccines/recs/default.htm.

³ State-supplied HPV4 vaccine is recommended for routine use in males and females beginning at 11-12 years with catch-up vaccination through 18 years of age.
